### Statement about Extended Mineral Reporting Template [EMRT]

20 February, 2026

Dear Customer,

Expanded Minerals Report Template [EMRT] , revised on 25 April, 2025, added copper, natural graphite, lithium, and nickel to the list of minerals subject to survey. The reason for adding natural graphite, lithium, and nickel is for the limited purpose of complying with the European Battery Regulation. NKK Switches has been excluding these three minerals from the scope of survey since NKK Switches' products don't contain batteries.

Referenced link: <https://www.responsiblemineralsinitiative.org/reporting-templates/emrt/>

Some of our suppliers currently do not disclose information about their smelters, for reasons such as the fact that EMRT-related minerals are not defined as conflict minerals. Due to the circumstances, NKK Switches is unable to identify all smelters that supply the EMRT-related minerals to our product supply chain.

If you have any questions, please contact our sales representatives.

Sincerely,

A handwritten signature in black ink that reads 'Shuji Odajima'.
