- Appearance

Change to Material of Spring in Rotary Knobs

There will be a revision to the material used for the spring in the AT4103 small knob and AT4104 large knob. These color tipped knobs are used with the FR01, MR and MRB Series Rotaries. The change to the material of the spring inside the knobs, which was previously carbon steel and will be revised to stainless steel, will apply to all standard and custom knobs. There will be no difference in the effectiveness of the knobs' function, and no dimensions are altered. Effected standard part numbers for the knobs are listed on the table below.

Series	Spring Before Change	Spring After Change
FR01 Rotaries with Metal Shaft MRA, MRAN & MRK Process Sealed Rotaries MRX, MRY & MRT Power Level Rotaries MRB PCB Process Sealed Rotaries	Carbon Steel	Stainless Steel

Notes

There are no changes to the knobs' dimensions or specifications.
Contact the factory if more details are needed.

Effected Standard Part Numbers				
AT4103A	AT4103E	AT4103H	AT4104C	AT4104G
AT4103B	AT4103F	AT4104A	AT4104E	AT4104H
AT4103C	AT4103G	AT4104B	AT4104F	_____

Effective Date

Changes in material for the spring in AT4103 and AT4104 rotary knobs will be effective July 2024.
