Changes to Case Material & Upgrade to UL Recognition for JP Series Pushbuttons

Type of Change:

- ☐ Engineering ☐ Part Number
☒ Product ☐ Appearance

I. There will be a revision to the material of the case and base for JP Series Pushbutton Switches, both the JPM and JPL models. The material, formerly melamine resin, will change to melamine phenol resin. These revisions will apply to all JP Series standard and custom switches. Effected standard part numbers are listed on the table below.

Changes for JP Series Pushbuttons

JPM & JPL Models	Before Change	After Change
Case/Base Material	Melamine Resin	Melamine Phenol Resin

Notes

- There are no changes to the switches' mechanical functionality, specifications, or dimensions.
- Contact information is below if more details are needed.

2. The UL identification marking will be updated to cULus, indicating combined approval of both UL and CSA Standards recognized by UL. The UL Standard No. UL1054 will change to UL61058-1. This revision will apply to JPM and JPL models, and both standard and custom switches from JP Series. Effected standard part numbers are on the table below.
