

NKK Switches' Compliance with EU-RoHS Environmental Standards & Substances

NKK Switches has been compliant with the environmental standards of the EU-RoHS directive (2011/65/EU) with respect to the six substances: Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyl and Polybrominated Diphenyl Ether, which was effective July 21, 2011. Furthermore, NKK has been working on compliance related to EU-RoHS directive (2015/863/EU) regarding Bis (2-Ethylhexyl) Phthalate, Butyl Benzyl Phthalate, Dibutyl Phthalate and Diisobutyl Phthalate, added on June 4, 2015.

We will continue to be environmentally conscious and meticulous, actively pursuing ways we can reduce harmful substances and providing eco-friendly products. We are grateful for our valued customers who have put their trust in us over the decades, and we are committed to not only provide outstanding quality and services, but to continue supplying environmentally safe products.

Substance	Maximum Level
Lead (Pb)	1000 ppm
Mercury (Hg)	1000 ppm
Cadmium (Cd)	100 ppm
Hexavalent Chromium (Cr ⁶⁺)	1000 ppm
Polybrominated Biphenyls (PBB)	1000 ppm
Polybrominated Diphenyl Ether (PBDE)	1000 ppm
Bis (2-Ethylhexyl) Phthalate (DEHP)	1000 ppm
Butyl Benzyl Phthalate (BBP)	1000 ppm
Dibutyl Phthalate (DBP)	1000 ppm
Diisobutyl Phthalate (DIBP)	1000 ppm

Notes

- This Change Notice indicates that none of the listed substances regulated by the current EU-RoHS Directive 2015/863/EU exceeds the levels specified in the directive with the exemptions.
- The CE marking applies to electrical equipment rather than to components installed into the equipment. (The marking signifies that products sold in the European Economic Area (EEA) have been determined to meet high safety, health and environmental protection requirements, and is recognized worldwide.)

Effective Date

This change for the production of all standard switches and accessories will be effective July 22, 2019.
